

Peak 1989 Parasite Loupe

The Peak Parasite Loupe is an improved version of the conventional magnifying glass.

A cute 20mm diameter parasite-like lens is cemented on a large 75mm diameter lens. The magnification of the large lens is 2.5x, while that of the small lens has a compound magnification of 5x. The lens is of high grade crown glass, and the magnified image is very sharp and clear.

This simple idea has proven to be very effective, and uses for the magnifier are unlimited not only in the ordinary household but in specialized fields. Try it once. You'll agree with us that it is most convenient and versatile.

Magnification: 2.5X, 5X
Lens Diameter: 75 mm (2.5X), 20 mm (5X)
Size: 80ø x 170 mm
Net Weight: 111 g
